New 50Hz 380/420V 3 Phase AC FlowMaster Pump

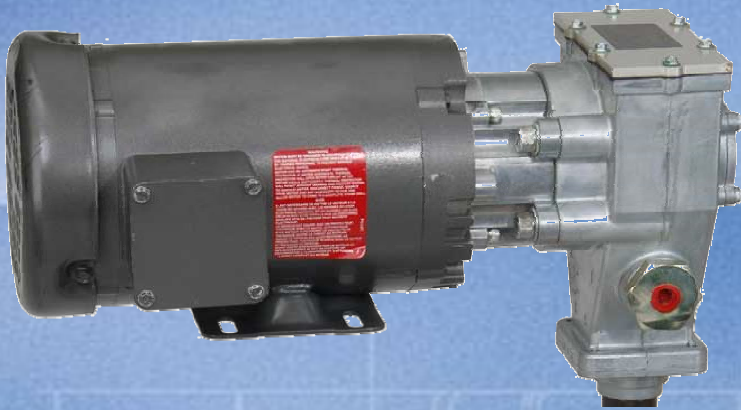

Just Plug It In!

The high-performance FlowMaster product line is a new generation of pump technology. Compact and versatile, its unique rotary drive and modular gear set let you adjust the pump to exactly fit your application.

Easy Installation -

- ***Wires directly to existing AC service***
- ***No need to tap into hydraulic circuits or pipe in compressed air means reduced installation costs***
- ***Integrates easily to many styles of lubrication systems***

The motion created by the electric rotary motor is converted into reciprocating pump motion providing an efficient flow.

Markets include:

- **Heavy industry**
 - Mining
 - Steel
 - Paper
- **General Industry**
 - Food/beverage
 - Automotive
 - Packaging
 - And others

Specifications		
Pump Model	85850	85851
Pump/Container Size	120 lb	400 lb
Pump Output	400 cm ³ /min (24.5 in ³ /min)	
Operating temperature	-40° C to 65° C (-40 to 150 ° F)	
Motor Max Temperature	Up to 105° C (220 ° F)	
Operating Voltage	380/420 Volts 3 Phase	
Motor Power	½ HP	
Pump Outlet	¼" NPTF	

Accessories		
Description	120 lb	400 lb
Follower Plate	85492	270982
Drum Cover	85474	85475
Vent Valve Assembly	85660	85661
Strainer	272180	272180
